Care Management

Every Home Care Package (HCP), including those being self-managed, will require some level of care management.

Care management is an important service that includes coordinating care and services that will help you achieve the the goals you identified in your Care Plan.

Resthaven provides two levels of care management:

Fully managed by Resthaven

When fully managed by Resthaven, the care management covers establishing and reviewing your Home Care Agreement and Care Plan, coordinating service provision by trained, supervised staff, responding to lifestyle/cultural preferences, liaising with you, your support network and identifying/addressing safety risks.

Care management charges align to staff roles/skills and increase with complexity of care.

Approximate care management time per HCP level is indicated in the schedule.

Self-managed Care Management

When self-managed, a fee is charged for activities Resthaven is required by legislation to undertake (establishment/review of the Home Care Agreement and Care Plan, supervision of Resthaven staff).

Approximate care management time is indicated in the schedule.
